| SP.ADO.TFRT       | Adolescent fertility rate<br>(births per 1,000 women<br>ages 15-19) | Adolescent fertility rate is the number of births per 1,000<br>women ages 15-19 Source: United Nations Population Division,<br>World Population Prospects.  | Health:   |
| AG.LND.AGRI.ZS    | - ·   | Agricultural land refers to the share of land area that is arable,<br>under permanent crops, and under permanent pastures. Arable<br>land includes land defined by the FAO as land under temporary<br>crops (double-cropped areas are counted once), temporary<br>meadows for mowing or for pasture, land under market or<br>kitchen gardens, and land temporarily fallow. Land abandoned<br>as a result of shifting cultivation is excluded. Land under<br>permanent crops is land cultivated with crops that occupy the<br>land for long periods and need not be replanted after each<br>harvest, such as cocoa, coffee, and rubber. This category<br>includes land under flowering shrubs, fruit trees, nut trees, and<br>vines, but excludes land under trees grown for wood or timber.<br>Permanent pasture is land used for five or more years for forage,<br>including natural and cultivated crops Source: Food and<br>Agriculture Organization, electronic files and web site. | Environment: Land<br>use  |
| NV.AGR.TOTL.ZS    | Agriculture, value added (%<br>of GDP)                              | Agriculture corresponds to ISIC divisions 1-5 and includes<br>forestry, hunting, and fishing, as well as cultivation of crops and<br>livestock production. Value added is the net output of a sector<br>after adding up all outputs and subtracting intermediate inputs.<br>It is calculated without making deductions for depreciation of<br>fabricated assets or depletion and degradation of natural<br>resources. The origin of value added is determined by the<br>International Standard Industrial Classification (ISIC), revision 3.<br>Note: For VAB countries, gross value added at factor cost is used<br>as the denominator Source: World Bank national accounts<br>data, and OECD National Accounts data files.  | Economic Policy &<br>Debt: National<br>accounts: Shares of<br>GDP & other |
| SH.STA.BRTC.ZS    | Births attended by skilled<br>health staff (% of total)             | Births attended by skilled health staff are the percentage of<br>deliveries attended by personnel trained to give the necessary<br>supervision, care, and advice to women during pregnancy, labor,<br>and the postpartum period; to conduct deliveries on their own;<br>and to care for newborns Source: UNICEF, State of the World's<br>Children, Childinfo, and Demographic and Health Surveys.   | Health:<br>Reproductive health  |
| GC.BAL.CASH.GD.ZS | Cash surplus/deficit (% of<br>GDP)                                  | Cash surplus or deficit is revenue (including grants) minus<br>expense, minus net acquisition of nonfinancial assets. In the<br>1986 GFS manual nonfinancial assets were included under<br>revenue and expenditure in gross terms. This cash surplus or<br>deficit is closest to the earlier overall budget balance (still<br>missing is lending minus repayments, which are now a financing<br>item under net acquisition of financial assets) Source:<br>International Monetary Fund, Government Finance Statistics<br>Yearbook and data files, and World Bank and OECD GDP<br>estimates.   | Public Sector:<br>Government<br>finance: Deficit &<br>financing           |
| EN.ATM.CO2E.PC    | CO2 emissions (metric tons per capita)                              | Carbon dioxide emissions are those stemming from the burning<br>of fossil fuels and the manufacture of cement. They include<br>carbon dioxide produced during consumption of solid, liquid,<br>and gas fuels and gas flaring Source: Carbon Dioxide<br>Information Analysis Center, Environmental Sciences Division,<br>Oak Ridge National Laboratory, Tennessee, United States.  | Environment:<br>Emissions   |

| SP.DYN.CONU.ZS    | Contraceptive prevalence,                          | Contraceptive prevalence rate is the percentage of women who  | Health:   |
|                   | any methods (% of women<br>ages 15-49)             | are practicing, or whose sexual partners are practicing, any form<br>of contraception. It is usually measured for women ages 15-49<br>who are married or in union Source: UNICEF's State of the<br>World's Children and Childinfo, United Nations Population<br>Division's World Contraceptive Use, household surveys including<br>Demographic and Health Surveys and Multiple Indicator Cluster<br>Surveys.  | Reproductive health   |
| EG.USE.ELEC.KH.PC | Electric power<br>consumption (kWh per<br>capita)  | Electric power consumption measures the production of power<br>plants and combined heat and power plants less transmission,<br>distribution, and transformation losses and own use by heat and<br>power plants Source: IEA Statistics © OECD/IEA 2014<br>(http://www.iea.org/stats/index.asp), subject to<br>https://www.iea.org/t&c/termsandconditions/  | Environment:<br>Energy production<br>& use                                |
| EG.USE.PCAP.KG.OE | Energy use (kg of oil<br>equivalent per capita)    | Energy use refers to use of primary energy before<br>transformation to other end-use fuels, which is equal to<br>indigenous production plus imports and stock changes, minus<br>exports and fuels supplied to ships and aircraft engaged in<br>international transport. Source: IEA Statistics © OECD/IEA 2014<br>(http://www.iea.org/stats/index.asp), subject to<br>https://www.iea.org/t&c/termsandconditions/   | Environment:<br>Energy production<br>& use                                |
| NE.EXP.GNFS.ZS    | Exports of goods and services (% of GDP)           | Exports of goods and services represent the value of all goods<br>and other market services provided to the rest of the world.<br>They include the value of merchandise, freight, insurance,<br>transport, travel, royalties, license fees, and other services, such<br>as communication, construction, financial, information, business,<br>personal, and government services. They exclude compensation<br>of employees and investment income (formerly called factor<br>services) and transfer payments Source: World Bank national<br>accounts data, and OECD National Accounts data files.   | Economic Policy &<br>Debt: National<br>accounts: Shares of<br>GDP & other |
| DT.DOD.DECT.CD    | External debt stocks, total<br>(DOD, current US\$) | Total external debt is debt owed to nonresidents repayable in<br>currency, goods, or services. Total external debt is the sum of<br>public, publicly guaranteed, and private nonguaranteed long-<br>term debt, use of IMF credit, and short-term debt. Short-term<br>debt includes all debt having an original maturity of one year or<br>less and interest in arrears on long-term debt. Data are in<br>current U.S. dollars Source: World Bank, International Debt<br>Statistics.   | Economic Policy &<br>Debt: External debt:<br>Debt outstanding             |
| SP.DYN.TFRT.IN    | Fertility rate, total (births per woman)           | Total fertility rate represents the number of children that would<br>be born to a woman if she were to live to the end of her<br>childbearing years and bear children in accordance with age-<br>specific fertility rates of the specified year Source: (1) United<br>Nations Population Division. World Population Prospects, (2)<br>Census reports and other statistical publications from national<br>statistical offices, (3) Eurostat: Demographic Statistics, (4) United<br>Nations Statistical Division. Population and Vital Statistics Reprot<br>(various years), (5) U.S. Census Bureau: International Database,<br>and (6) Secretariat of the Pacific Community: Statistics and<br>Demography Programme. |   |

|-------------------|--|--|--|
| BX.KLT.DINV.CD.WD | Foreign direct investment,<br>net inflows (BoP, current<br>US\$) | Foreign direct investment refers to direct investment equity<br>flows in the reporting economy. It is the sum of equity capital,<br>reinvestment of earnings, and other capital. Direct investment is<br>a category of cross-border investment associated with a resident<br>in one economy having control or a significant degree of<br>influence on the management of an enterprise that is resident in<br>another economy. Ownership of 10 percent or more of the<br>ordinary shares of voting stock is the criterion for determining<br>the existence of a direct investment relationship. Data are in<br>current U.S. dollars Source: International Monetary Fund,<br>Balance of Payments database, supplemented by data from the<br>United Nations Conference on Trade and Development and<br>official national sources. | Economic Policy &<br>Debt: Balance of<br>payments: Capital &   |
| AG.LND.FRST.K2    | Forest area (sq. km)   | Forest area is land under natural or planted stands of trees of at<br>least 5 meters in situ, whether productive or not, and excludes<br>tree stands in agricultural production systems (for example, in<br>fruit plantations and agroforestry systems) and trees in urban<br>parks and gardens Source: Food and Agriculture Organization,<br>electronic files and web site.   | Environment: Land<br>use   |
| NY.GDP.MKTP.CD    | GDP (current US\$)   | GDP at purchaser's prices is the sum of gross value added by all<br>resident producers in the economy plus any product taxes and<br>minus any subsidies not included in the value of the products. It<br>is calculated without making deductions for depreciation of<br>fabricated assets or for depletion and degradation of natural<br>resources. Data are in current U.S. dollars. Dollar figures for GDP<br>are converted from domestic currencies using single year official<br>exchange rates. For a few countries where the official exchange<br>rate does not reflect the rate effectively applied to actual foreign<br>exchange transactions, an alternative conversion factor is used<br>Source: World Bank national accounts data, and OECD National<br>Accounts data files.  | Economic Policy &<br>Debt: National<br>accounts: US\$ at<br>current prices:<br>Aggregate<br>indicators |
| NY.GDP.MKTP.KD.ZG | GDP growth (annual %)  | Annual percentage growth rate of GDP at market prices based<br>on constant local currency. Aggregates are based on constant<br>2010 U.S. dollars. GDP is the sum of gross value added by all<br>resident producers in the economy plus any product taxes and<br>minus any subsidies not included in the value of the products. It<br>is calculated without making deductions for depreciation of<br>fabricated assets or for depletion and degradation of natural<br>resources Source: World Bank national accounts data, and<br>OECD National Accounts data files.  | Economic Policy &<br>Debt: National<br>accounts: Growth<br>rates                                       |

|-------------------|--|---|--|
| NY.GNP.ATLS.CD    | GNI, Atlas method (current<br>US\$)    | GNI (formerly GNP) is the sum of value added by all resident<br>producers plus any product taxes (less subsidies) not included in<br>the valuation of output plus net receipts of primary income<br>(compensation of employees and property income) from abroad.<br>Data are in current U.S. dollars. GNI, calculated in national<br>currency, is usually converted to U.S. dollars at official exchange<br>rates for comparisons across economies, although an alternative<br>rate is used when the official exchange rate is judged to diverge<br>by an exceptionally large margin from the rate actually applied in<br>international transactions. To smooth fluctuations in prices and<br>exchange rates, a special Atlas method of conversion is used by<br>the World Bank. This applies a conversion factor that averages<br>the exchange rate for a given year and the two preceding years,<br>adjusted for differences in rates of inflation between the<br>country, and through 2000, the G-5 countries (France, Germany,<br>Japan, the United Kingdom, and the United States). From 2001,<br>these countries include the Euro area, Japan, the United<br>Kingdom, and the United States. Source: World Bank national<br>accounts data, and OECD National Accounts data files. | Economic Policy &<br>Debt: National<br>accounts: Atlas GNI<br>& GNI per capita |
| NY.GNP.MKTP.PP.CD | GNI, PPP (current<br>international \$) | PPP GNI (formerly PPP GNP) is gross national income (GNI)<br>converted to international dollars using purchasing power parity<br>rates. An international dollar has the same purchasing power<br>over GNI as a U.S. dollar has in the United States. Gross national<br>income is the sum of value added by all resident producers plus<br>any product taxes (less subsidies) not included in the valuation<br>of output plus net receipts of primary income (compensation of<br>employees and property income) from abroad. Data are in<br>current international dollars. For most economies PPP figures<br>are extrapolated from the 2011 International Comparison<br>Program (ICP) benchmark estimates or imputed using a<br>statistical model based on the 2011 ICP. For 47 high- and upper<br>middle-income economies conversion factors are provided by<br>Eurostat and the Organisation for Economic Co-operation and<br>Development (OECD) Source: World Bank, International<br>Comparison Program database.   | Economic Policy &<br>Debt: Purchasing<br>power parity                          |
| NE.GDI.TOTL.ZS    | Gross capital formation (%<br>of GDP)  | Gross capital formation (formerly gross domestic investment)<br>consists of outlays on additions to the fixed assets of the<br>economy plus net changes in the level of inventories. Fixed<br>assets include land improvements (fences, ditches, drains, and<br>so on); plant, machinery, and equipment purchases; and the<br>construction of roads, railways, and the like, including schools,<br>offices, hospitals, private residential dwellings, and commercial<br>and industrial buildings. Inventories are stocks of goods held by<br>firms to meet temporary or unexpected fluctuations in<br>production or sales, and "work in progress." According to the<br>1993 SNA, net acquisitions of valuables are also considered<br>capital formation Source: World Bank national accounts data,<br>and OECD National Accounts data files.  | Economic Policy &<br>Debt: National<br>accounts: Shares of<br>GDP & other      |
